

FM Handover Sheet 01

project originator volume level type role number status revision

LAB - BBD - ZZ - XX - DR - Z - 3001

The screenshot displays the FM180 BIM4FM consultants software interface. The top navigation bar includes tabs for Frontpage, Asset register, Human resources, Tasks, Finance management, Operation management, Service management, and Administration. A search icon and user profile (Steve Owen) are also present. Below the navigation bar, there are shortcuts for Sites, Asset modules, Setup of sites, Persons, Task planning, Work orders, and Organisations. The main content area is divided into two panels: 'Processing of Location Elements' on the left and 'Location Elements' on the right. The 'Processing of Location Elements' panel shows a tree view of the project structure, including 'LEGO BIM', 'Buildings', 'Villa Savoye (Villa Savoye)', '01 First Floor (01 First Floor)', 'Datum / Site Model (Datum / Site Model)', 'GF Ground Floor (GF Ground Floor)', and 'RF Roof (RF Roof)'. The 'Location Elements' panel shows a detailed view of the 'Villa Savoye (Villa Savoye)' project, listing various location elements such as '01 First Floor. (01 First Floor)', 'Datum / Site Model. (Datum / Site Model)', 'GF Ground Floor. (GF Ground Floor)', and 'RF Roof. (RF Roof)'. A double-headed arrow indicates the relationship between the two panels. The bottom of the interface features a copyright notice for MainManager V11.6 and the MainManager logo.
